- liczba kartek: **100**

Aukcja dotyczy 1 sztuki.

Wzory zeszytów są wysyłane losowo.

MOTO TECHNOLOGY

SPEED

An engine is a type of machine designed to convert one form of energy into mechanical energy. A continuous supply of energy is necessary for the engine to work. Heat engines burn fuel to create heat, which creates force. Electric motors convert electrical energy into mechanical motion by the moving parts of the engine. In this way, the engine drives machines and vehicles.
